Unit Outline

This unit will teach you the skills and knowledge for the operation of a industrial truck equipped with lifting media made up of a mast and an elevating load carriage to which is attached a pair of fork arms or other arms that can be raised 900 mm or more above the ground, but does not include a pedestrian-operated truck or a pallet truck. This unit requires the operator to be able plan the work, conduct routine checks on the forklift, shift loads in a safe manner, and shut down and secure the equipment after the completion of operations. Assessment of this unit will be undertaken in line with WorkSafe licensing requirements and result in a HRW license.

Delivery Information

Two or three day courses are offered by Yugo Driving School.

The two day course is for applicants with forklift experience and can substantiate this experience by having more than 30 hours recorded in a support letter from the employer. The two day course has minimal time allowed for knowledge development, questions, discussions and driver practice on the forklift. Students will receive a 2 day Session/Assessment Plan.

The three day is an extension of the two day course, allowing more time for knowledge development, questions and discussion. Students will receive a 3 day Session/Assessment Plan.

Two and three day courses require the 'Forklift Safety and Licence Guide Book' to be read, the 'Forklift Learner Workbook' to be completed (approx 32 hours) after enrolment but prior to commencing the course. This ensures the back ground theory has been covered so that the unit can be adequately delivered in the specified timeframe. If the pre-reading and questions are not completed and the student does not pass the theory assessment they will forfeit their fee.

All courses consist of theory training in the classroom (minimal for the 2 day course) and practical training in a simulated "on the job" situation in the Yugo purpose designed warehouse. The classroom activities are delivered face to face with the trainer and cover knowledge and calculations. The practical activities and student practical assessment are conducted in the Yugo warehouse. The course is approximately:

- Two day - 60% classroom and 40% practical depending on the needs and experience of the students
- Three day - 70% classroom and 30% practical depending on the needs and experience of the students.

Courses are run by Yugo on an as needs basis. All courses are conducted from 7:30am/8:30am to 4:30pm.

The Assessment Tasks to complete this unit are;

Complete the Nationally WHS endorsed HRW assessment instruments

If a student is assessed as being not yet competent a retraining and reassessment process can take place at a cost of \$150 per hour. Worksafe have defined time constraints on the re-assessment process. Further details are available by contacting Yugo Driving School.

Recognition of Prior Learning (RPL)

Recognition of Prior Learning is a process by which a prospective student can demonstrate knowledge and competencies currently held, as a result of past experience or training, and through this, possibly gain credit towards a qualification. The Worksafe mandated tool allows for RPL of training but not assessment therefore all applicants will be required to undertake the 3 mandated assessment instruments described above. The Yugo RPL process for determining RPL of training involves the completion of a Self assessment Checklist based on the critical aspects of evidence of the unit of competency. Based on the response to these documents prior learning will be taken into account by enrolling in a shorter course most suited to the student.
